

DEMOLITION

A Tradition of Excellence

PROJECT:

Maine Yankee Nuclear Power Plant

SERVICES:

Managed and completed demolition of all structures on the site, including: Turbine Building, Circulating Water Pump House, Service Building, Control Room, Fuel Oil Bunker, Auxiliary Boilers and Stack, Emergency Diesel Generator Building, Steam and Valve House, Spray Building, Primary Auxiliary Building, Reactor MCC Building, Containment Dome, Off Gas Stack, Fuel Building, RWST Tank, DWST Tank, SBTT Tank, High Radioactive Bunker, Yard Crane, Information Center, Staff Building and Warehouses. Used a specialty design High Reach Excavator for the Containment Dome and explosives to soften concrete percussively in the dome and the Turbine Pedestal. Also used explosives to implode the Building and 360-ton Containment Polar Crane. Processed and loaded several million pounds of low level Radioactive Waste on to rail cars.

LOCATION:

Wiscasset, Maine
