

SITE DEVELOPMENT

A Tradition of Excellence

PROJECT:

Providence Station Platform Modifications and Station Renovations

SERVICES:

Removed and replaced high level concrete platforms. Installed a 250 foot overhead catenary truss after demolishing the existing overhead catenary structures. Also installed a flash mitigation system. Performed chemical grouting of tunnels and renovated existing train station facility. Successfully protected pedestrian traffic while the station remained operational during the entire project.

LOCATION:

Providence Station, Providence, Rhode Island
